產品簡介

Product introduction

DIT-MCO 自動化電纜分析儀的模組化設計提供了定制化的選項。產品包括如下:

The modular design of DIT-MCO's automated wiring analyzers offers customization options. The products include the following:

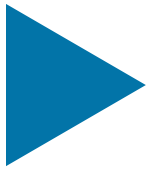

**2650分佈式線束分析儀
Model 2650 – Distributed
Wiring Harness Analyzer)**

- ◆ The Model 2650 wiring harness analyzer incorporates modularity to meet your testing needs. The modular switching units can rack and stack in a cabinet to provide concentrated test points or be distributed around the Unit Under Test (UUT), thus eliminating long, cumbersome adapter

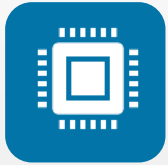

**2115 – 桌上型測試儀
Model 2115 – Benchtop Tester**

- ◆ This benchtop tester, designed for smaller test applications, easily fits in your fabrication or test department

應用範疇

Application

◆ Space & Aerospace/太空與航空應用

◆ Military Applications/軍事應用
